	QatarEnergy-IS PROCEDURE FOR OFFSHORE WATER SAMPLING DOC. NO. IS-PRC-HSE-016 REV. 01
---	---

1.0 PURPOSE

To ensure that produced potable water is safe for human consumption and to detail the monthly monitoring and reporting Procedure.

2.0 SCOPE AND APPLICABILITY

This procedure applies to all QatarEnergy–IS operated and contracted offshore facilities (e.g., PS-1, Accommodation & Construction Barges, etc.)

3.0 ROLES AND RESPONSIBILITY

OCCUPATIONAL HEALTH & PARAMEDIC (OHP)

- Receives and forwards water sample results to Industrial Hygienist and Offshore Installation Superintendent.
- Informs appropriate departments if there are concerns with the water analysis results
- Designates the laboratory for analysis of water samples.

WATER TESTING LABORATORY

- Provide monthly chemical and micro bacterial analysis of potable drinking water according to the WHO Guidelines for Drinking Water Quality.
- Supply the appropriate containers for sampling.
- Receive water samples and obtain results.
- Communicate the results to QatarEnergy-IS.

WATER SAMPLER

- Collect potable water samples as prescribed by this procedure.
- Ensure samples are sent to Dukhan lab within the stated time frame

CAMP BOSS

- Ensure collection of water samples for Biological analysis.
- Biological water sample results shall be submitted to OHP on monthly basis

4.0 PROCEDURAL STEPS

4.1 WATER SAMPLE BOTTLES

On a monthly basis, the OHP shall send sample bottles to QatarEnergy Laboratory on Halul Island. Two plastic water sampling bottles should be utilised to send chemical analysis samples. Samples should be collected from one galley site and one other random source (accommodation sink, shower etc.) each month. Site sources may vary if conditions require.

4.2 WATER SAMPLE COLLECTION

Water samples shall be collected monthly and on the day that they will be sent to Halul by helicopter.

- Run the water from the drinking point for 3-4 minutes prior to filling the bottles.
- Measure the temperature of the water at the collection point.
- Rinse the glass/plastic sampling bottle with the running sample water to remove any potential dust or other contaminants.

	QatarEnergy-IS PROCEDURE FOR OFFSHORE WATER SAMPLING DOC. NO. IS-PRC-HSE-016 REV. 01
---	---

- First fill the glass/plastic bottle to the very top to ensure a minimal amount of air space allowance in the sampling bottle and secure with cap.
- Label each container with date and time of sampling, point of sampling, temperature of water at collection points, a reference number and sampler's name
- Place secured labelled sample containers into a box.
- Complete the water analysis request form (Appendix A) and include it with samples.
- Ensure proper transportation announcements are made prior to helicopter dispatch Halul. Inform PS1 HLO, Halul HLO, Halul Laboratory and Halul Co-Ordinator via email prior to dispatch of sample

4.3 WATER SAMPLE TRANSPORT

- The box shall be labelled and transported by helicopter to Halul laboratory for analysis.
- Sample bottles will be supplied by the Laboratory and sent to all locations ready for the next water samples to be collected.

4.4 CONTRACTOR FACILITIES

- Contractor facilities are requested to have their potable water tested monthly by an independent laboratory. Standard collection protocol should be utilized.
- The laboratory selected shall follow the WHO Guidelines for Drinking Water Quality standards and
- Results shall be made available, upon request, to QatarEnergy-IS representative and shall be sent monthly to OHP.
